Ignacio Naranjo

Senior Backend Engineer | Java, Distributed Systems & Applied AI

Java • Spring Boot • Kafka • Distributed Systems • Azure • Applied AI / GenAI

Mexico | naranjoguerraji@hotmail.com | GitHub | LinkedIn

SUMMARY

Senior Backend Engineer with 9+ years of experience designing and building scalable, cloud-native and distributed systems using Java, Spring Boot, Spring Batch, microservices, REST APIs, and Apache Kafka. Experienced in event-driven architectures, Azure, Kubernetes, production troubleshooting, and business-critical enterprise applications for international clients.

Currently pursuing a Master's degree in Applied Artificial Intelligence, with hands-on academic and project experience in machine learning, deep learning, computer vision, generative AI, LLM-based applications, and AI-assisted software development.

TECHNICAL SKILLS

- Languages: Java (8–21), Python, SQL
- Backend: Spring Boot, Spring Batch, Spring MVC, Spring Security, Spring Data JPA, REST APIs, JPA/Hibernate
- Architecture & Messaging: Microservices, Distributed Systems, Event-Driven Architecture, Apache Kafka, Azure Event Hubs, Clean/Hexagonal Architecture
- Databases: PostgreSQL, MongoDB, Oracle, Flyway
- Cloud & DevOps: Microsoft Azure, AKS, Azure Key Vault, Azure SQL, Docker, Kubernetes, Rancher, GitHub Actions, Azure DevOps, Jenkins, Maven, Git
- Testing & Observability: JUnit, Mockito, Selenium, Cucumber, Postman, Dynatrace, Mezmo, Micrometer, OpenTelemetry, Prometheus, Jaeger
- AI & Data: Python, PyTorch, scikit-learn, NumPy, pandas, Machine Learning, Deep Learning, Computer Vision, Generative AI, Transformers, OpenAI API, GitHub Copilot, AI-Assisted Development

PROFESSIONAL EXPERIENCE

Luxoft – Java Software Developer | Feb 2022 – Present | Remote from Mexico | U.S.-based Client
Client: American Airlines
Crew Scheduling System (DOTC RAS) – MMAT | Sep 2025 – Present

- Develop and maintain Java/Spring backend functionality and Spring Batch workflows supporting pilot modification, transfer, and scheduling operations.
- Build Kafka listeners integrated with Azure Event Hubs to detect Recovery Obligation pilots and support event-driven processing across distributed services.
- Support REST integrations, CI/CD, Azure/Kubernetes environments, production troubleshooting, and observability using Rancher, Dynatrace, Mezmo, and Azure DevOps.
- Provide technical guidance and people leadership to a five-person team, supporting performance, goal setting, career development, and delivery while remaining hands-on.

Recovery Obligations System (RFW) | Nov 2024 – Sep 2025

- Rapidly ramped up on a new technical and business context, developing Java 21/Spring Boot microservices with Apache Kafka and MongoDB.
- Designed Kafka producers, consumers, listeners, and asynchronous event-processing workflows for distributed backend services.
- Supported cloud-native delivery on Azure using Docker, Kubernetes, Rancher, and GitHub Actions, with Dynatrace and Mezmo for observability and incident analysis.
- Developed automated tests with JUnit/Mockito and collaborated with U.S. and India teams on releases, troubleshooting, and continuous improvement.

Crew Scheduling System (DOTC RAS) | Apr 2022 – Nov 2024

- Developed Java 8/Spring Boot backend services and enterprise Spring Batch workflows for business-critical crew scheduling operations.

- Contributed to the modernization and migration of on-premises applications to Azure, including Docker/Kubernetes deployments and CI/CD with GitHub Actions and Jenkins.
- Built REST integrations using Oracle, SQL/JDBC, and Azure Blob Storage; supported automated testing, production troubleshooting, and root-cause analysis.
- Contributed to delivery cadence and team onboarding by maintaining user stories in Azure DevOps and sharing technical and business context with a newly formed team.

Globant – SSr Java Developer | Oct 2021 – Jan 2022 | Remote, Mexico
Internal Initiative: Hotel Management Platform

- Contributed to an internal Java/Spring Boot initiative, developing REST APIs and backend functionality for a hotel management platform using Java, Spring Boot, and microservices principles.

HCL Technologies – Senior Software Engineer | Aug 2020 – Oct 2021 | Mexico
Global collaboration across U.S., China & India
Client: IGT | Gaming Industry

- Coordinated application validation, release readiness, defect analysis, and delivery support while providing technical guidance to team members as Team Lead.
- Used Java, SQL, MongoDB, Postman, and JMeter to investigate issues and validate APIs, data, and performance; improved processes, documentation, and knowledge transfer.
- Received the Star Award for outstanding contributions, leadership, knowledge sharing, and support during critical release phases.

TATA Consultancy Services – Software Engineer | Jul 2017 – Aug 2020 | Mexico
Global collaboration across India, U.S. & Canada
Client: Citi Banamex | Financial Services

- Supported enterprise banking applications used by internal banking teams across LATAM, contributing to application stability, incident resolution, and ongoing system maintenance.
- Investigated issues across Java, SQL, and mainframe environments while contributing to the migration and automation of legacy regression-testing processes within globally distributed teams.

SELECTED TECHNICAL PROJECTS

3D Object Detection with SUN RGB-D — Python, PyTorch, VoteNet, Computer Vision | GitHub
Developed and trained a 3D object detection pipeline using SUN RGB-D point-cloud data, covering preprocessing, inference, visualization, and quantitative model evaluation.

Java + OpenAI Integration — Java, Spring Boot, REST APIs, OpenAI API, Generative AI | GitHub
Built a Spring Boot backend demonstrating how generative AI capabilities can be integrated into Java applications through REST APIs and a decoupled service layer.

Lemon App — Java, Spring Boot, PostgreSQL, REST APIs, Clean/Hexagonal Architecture, Offline-First
Designing an independent agricultural platform for harvest operations, including backend architecture, REST APIs, persistence, offline synchronization, and a data foundation for future analytics and Applied AI.

EDUCATION

Tecnológico de Monterrey — Master's Degree in Applied Artificial Intelligence — In Progress
2025–Present | Relevant Areas: Machine Learning, Deep Learning, Computer Vision, NLP, MLOps

Tecnológico Nacional de México — B.S. in Computer Systems Engineering
2017 | Focus: Mobile and Web Development

CERTIFICATIONS

- NVIDIA Deep Learning Institute | Fundamentals of Deep Learning | Mar 2026 | *Credential*
- ICAgile Certified Professional – Agile Product Ownership (ICP-APO) | Mar 2026 | *Credential*
