

Jose Ignacio Naranjo Guerra

Java Backend Developer | Kafka • Spring Boot • Azure
• Microservices

 naranjoguerraji@hotmail.com |  [GIT Profile](#)

 Remote | Based in Mexico | Open to global opportunities

SUMMARY

Highly skilled Java Backend Developer with 9+ years of experience designing and implementing scalable cloud-native microservices and backend solutions. Specialized in Java (8–21), Spring Boot, and Apache Kafka (3.5+ years) for building event-driven architectures and real-time processing systems. Proficient with MongoDB, SQL, RESTful APIs, and CI/CD pipelines using GitHub Actions and Jenkins. Experienced in cloud deployments on Azure, container orchestration with Docker and Kubernetes, and observability with Dynatrace and Mezmo. Strong background in test automation (JUnit, Mockito, Selenium, Cucumber).

Currently pursuing a master's degree in Applied Artificial Intelligence to enhance expertise in intelligent, data-driven systems. Seeking to contribute to innovative, global projects as a Senior Backend Engineer or Kafka/Microservices Specialist.

TECHNICAL SKILLS

-  Programming: Java (8–21), SQL, Python, JavaScript
-  Frameworks: Spring Boot, Spring Security, Spring MVC, Lombok
-  Messaging/Event Streaming: Apache Kafka (3.5+ years), RabbitMQ (familiar)
-  Databases: MongoDB, Oracle, Azure Blob Storage
-  Cloud & DevOps: Azure, Docker, Kubernetes, GitHub Actions, Azure DevOps, Rancher
-  Testing & QA: JUnit, Mockito, Selenium, Cucumber, Postman
-  Monitoring & Observability: Dynatrace, Mezmo (LogDNA)
-  Methodologies: Agile Scrum, CI/CD, Clean Code, Microservices

PROFESSIONAL EXPERIENCE

Luxoft – Java Software Developer

Feb 2022 – Present | Texas (Remote, international)

Client: American Airlines

Project: Obligation Recovery System (Nov 2024 – Present)

- Designed and developed scalable microservices with Java 21, Spring Boot, and Spring Security.
- Implemented Kafka listeners to process asynchronous events ensuring reliable and low-latency message consumption.
- Developed producers and consumers for event-driven communication between services.
- Built REST APIs integrated with Kafka and MongoDB for data persistence and asynchronous workflows.
- Automated CI/CD with GitHub Actions and deployed solutions to Azure cloud.
- Containerized services using Docker and Kubernetes; managed via Rancher.
- Monitored application health and performance via Mezmo and Dynatrace.
- Actively collaborated in global Agile Scrum teams across the US and India.

Tech Stack: Java 21, Spring Boot, MongoDB, Kafka, Azure, Docker, Kubernetes, GitHub Actions, Rancher, Mezmo, Dynatrace, JUnit, Selenium, Cucumber.

Project Pilot Scheduling System (Feb 2022 – Nov 2024)

- Built microservices in Java 8 for pilot scheduling and crew assignments.
- Integrated Azure Blob Storage for document handling across environments.
- Developed and validated APIs using Postman; managed pipelines with Jenkins.
- Supported debugging and deployments in local and production environments.

Tech Stack: Java 8, Spring Boot, Azure Blob Storage, Jenkins, Oracle, JUnit 5, Mockito, SQL, GitHub, Azure DevOps.

OTHER PROFESSIONAL EXPERIENCE

HCL Technologies – Senior Software Engineer

Aug 2020 – Dec 2021 | Mexico, USA, China, India

Client: IGT (Gaming Industry)

- Improved test case creation processes and implemented documentation guides for onboarding.
- Facilitated knowledge transfers and authored internal onboarding guides...
- Won Star Award for outstanding contributions and knowledge sharing during release phases.

Tech Stack: Java, MongoDB, Postman, SQL, Jira, Bitbucket, JMeter, Scrum, REST API Testing, Zephyr.

TATA Consultancy Services – Software Engineer
Jul 2017 – Aug 2020 | Mexico, India, USA, Canada
Client: Financial Industry (Citi Banamex)

- Supported web applications for US banking clients, collaborating across global teams.
- Migrated legacy test cases and automated regression testing procedures.

Tech Stack: Java, SQL, Jira, Manual Testing, Mainframe.

LANGUAGES

Spanish – Native
English – Advanced (C1)
Portuguese – Upper Intermediate (B2)

EDUCATION

2025 – Present
Tecnológico de Monterrey
M.Sc. in Applied Artificial Intelligence (in progress)
Relevant topics: Machine Learning, Deep Learning, Data Analytics, Computer Vision

2017
Tecnológico Nacional de México, Campus Apatzingán, Michoacán
Computer Systems Engineering, Mobile and Web Development.

TRAINING COURSES

Mar 2025 Enterprise Data Science in Practice
Mar 2025 Data Analysis Using Python
Dec 2022 ENG-001 - General English Course Mexico Summer 2022
